Sitting still like a frog – Little Frog

Mindfulness and Concentration Exercises for Grade 2

Anbieter / Facilitator: Katja Fleck (Diplom-Psychologin, Mindful Coach, Management Phoenix Centre)

Many children and adolescents have difficulty concentrating. They do not sleep well, worry and have concerns. They also find it difficult to relax, or to simply switch off and do nothing. And they are continually “online”. Their head is too full, the triggers too many.

They are told to so many things. By themselves, by school, by society. How do you teach a child to relax, to stop worrying, to trust in their own qualities and stay afloat in this demanding 21st century?

“You can’t stop the waves in your life, but you can learn to surf”

For children ...

A peaceful mind is created by teaching children at a young age to calm their attention, to stabilise and to focus. An ‘un-stressed’ mind learns better, finds different solutions for the same problems and reacts less impulsively from automatic pilot. More aware and from a place of calm. And that really makes a difference.

For parents...

Parents are encouraged to try out the exercises at home with their children.
